UCLA

UNIVERSITY OF CALIFORNIA

DIVERSITY STATEMENT

**RECOMMENDED TO THE UNIVERSITY OF CALIFORNIA BY
THE ACADEMIC SENATE OF THE UNIVERSITY OF CALIFORNIA**

Adopted by the Assembly of the Academic Senate May 10, 2006

Endorsed by the President of the University of California June 30, 2006

Adopted as Amended by the Assembly of the Academic Senate April 22, 2009

Endorsed as Amended by the President of the University of California August 17, 2010

The diversity of the people of California has been the source of innovative ideas and creative accomplishments throughout the state's history into the present. Diversity – a defining feature of California's past, present, and future – refers to the variety of personal experiences, values, and worldviews that arise from differences of culture and circumstance. Such differences include race, ethnicity, gender, age, religion, language, abilities/disabilities, sexual orientation, gender identity, socioeconomic status, and geographic region, and more.

Because the core mission of the University of California is to serve the interests of the State of California, it must seek to achieve diversity among its student bodies and among its employees. The State of California has a compelling interest in making sure that people from all backgrounds perceive that access to the University is possible for talented students, staff, and faculty from all groups. The knowledge that the University of California is open to qualified students from all groups, and thus serves all parts of the community equitably, helps sustain the social fabric of the State.

Diversity should also be integral to the University's achievement of excellence. Diversity can enhance the ability of the University to accomplish its academic mission. Diversity aims to broaden and deepen both the educational experience and the scholarly environment, as students and faculty learn to interact effectively with each other, preparing them to participate in an increasingly complex and pluralistic society. Ideas, and practices based on those ideas, can be made richer by the process of being born and nurtured in a diverse community. The pluralistic university can model a process of proposing and testing ideas through respectful, civil communication. Educational excellence that truly incorporates diversity thus can promote mutual respect and make possible the full, effective use of the talents and abilities of all to foster innovation and train future leadership.

Therefore, the University of California renews its commitment to the full realization of its historic promise to recognize and nurture merit, talent, and achievement by supporting diversity and equal opportunity in its education, services, and administration, as well as research and creative activity. The University particularly acknowledges the acute need to remove barriers to the recruitment, retention, and advancement of talented students, faculty, and staff from historically excluded populations who are currently underrepresented.

INTRODUCTION

UCLA Faculty Diversity Statistics Monograph is published annually and provides a snapshot of the regular rank faculty with respect to gender, race, and ethnicity in the schools, divisions, and departments on the UCLA campus. The David Geffen School of Medicine also publishes a separate monograph of their faculty.

The Regular Rank Faculty Diversity Statistics Monograph consists of three data segments: snapshot data on all regular faculty appointments on the UCLA payroll as of October 1, 2013, aggregate data on the new appointments made during the past five academic years, and basic graphs of the historical data by gender and ethnicity for minority groups. The graphs show changes in percentage of women and members of minority groups for all the academic units over the past five years. All the statistics were reviewed by the schools and divisions for factual accuracy.

The monograph also includes availability data that provide estimated numbers of potential tenured and tenured-track faculty of a particular minority group in a particular field. The availability of a group, when compared with the actual number of faculty of that group in a unit, provides a rough estimate of the potential diversity of the actual faculty assuming equivalent selection over time.

In general, availability data represent the potential faculty pool of those whose doctoral degree or terminal professional degree is the same as the departmental discipline. In multidisciplinary departments, a number of disciplines may be represented and therefore the availability data represent graduates with degrees in the specific area. The calculation of these estimates is outlined in Appendix A.

The data presented are by academic department. Other structures such as interdisciplinary programs (IDPs), center, or institutes are not included here. Most faculty members are represented in their home departments, but many of them have a portion of their FTE attached to an institute or IDP. In this volume, such split appointments are represented so that the departmental data reflect the portion of the faculty FTE (full time equivalent) attached to each department. For that reason, many departmental totals reflect partial FTEs.

The data presented here, as well as additional faculty demographic data are posted on the Diversity & Faculty Development website at <http://www.faculty.diversity.ucla.edu>.

We hope you find this monograph a useful resource in assessing the ethnic and gender composition of the academic units and of the campus. Other aspects of diversity, such as family or veteran status, sexual orientation and disability, are not included in these statistics, but information and resources related to them may be found on the above-mentioned website.

Christine Littleton
Vice Provost
Diversity & Faculty Development

APPENDIX A

ESTIMATES OF ACADEMIC AVAILABILITY

In 2013, UCLA continued to make progress in developing more accurate availability estimates for academic positions, focusing attention on updating and refining statistics on the diversity of potential applicants with the appropriate qualifications for untenured and tenured positions in each school.

In all but the School of Law, School of Nursing, and School of Dentistry, a four-step process was undertaken to determine availability estimates. First, faculty specialties were culled from the UCLA Payroll and Personnel System (PPS) and degree fields on curriculum vitas. Second, faculty specialties were cross-walked to a national database that reports degree completions by specialty, gender, and race/ethnicity. Third, national percentages of doctorates (or, in some cases, master's, bachelor's, or M.D.s) received by females, African Americans, Asians, Hispanics, and Native Americans were calculated by specialty. Fourth, these national percentages were weighted by the number of FTE within a given unit that was associated with the national-level specialty. An average of the weighted percentages was then calculated to achieve a unit-level availability estimate by gender and race/ethnicity.

For the Divisions in the College of Letters and Science, the Graduate School of Education and Information Studies, the School of Engineering and Applied Science, the Anderson School of Management, and the Luskin School of Public Affairs availability estimates were based upon data collected by the National Opinion Research Center (NORC) and from the Integrated Postsecondary Education Data System (IPEDS) on number of doctoral degrees awarded in faculty specialties represented in each unit.

For the School of the Arts and Architecture and the School of Theater, Film and Television, availability estimates were based on data from NORC on doctorates in specialties represented in the schools, as well as data from IPEDS on doctorates, master's and bachelor's degrees. Availability estimates were further refined in these schools to reflect the highest degree earned by a faculty member.

For the School of Medicine, availability estimates were based on data from the Association of American Medical Colleges (AAMC) on current tenured and tenure-track faculty in U.S. medical schools.

For the Fielding School of Public Health, availability estimates were based on data from NORC and IPEDS on doctorates in specialties represented in the school as well as data from the AAMC on the diversity of current tenured and tenure-track faculty in U.S. medical schools.

For the School of Law, availability estimates were based on data from the American Association of Law Schools (AALS) Directory of Law Teachers Data on full and associate professors in U.S. Schools of Law, as well as on the Faculty Appointment Registers Data on new faculty and candidates.

For the School of Nursing, availability was estimated based on data from the American Association of Colleges of Nursing (AACN) on graduates of doctoral nursing programs and on full-time faculty in U.S. schools of nursing (both members and non-members of AACN).

For the School of Dentistry, availability estimates were based on a combination of IPEDS data on doctorates in dental clinical sciences/graduate dentistry, American Dental Association (ADA) data on U.S. dental school graduates, and ADA data on full-time tenured and tenure-track dental/clinical science faculty in U.S. dental schools.
